It was released on 13 August 2013 for iOS and Android, with versions for Windows and macOS following on 22 December 2014. The player controls an icon to navigate music-based levels, avoiding obstacles like spikes.[citation needed]The game comprises 26 full-length levels created by the developer: 22 are auto-scrolling, and 4 are 'platformer' levels. The game includes a level creation system, enabling players to design custom levels, share them online, and play levels created by other users. Players can collect in-game currencysuch as stars, moons, coins, mana orbs and diamondsfrom official and user-generated levels or chests.Three spin-off games accompany the main series: Geometry Dash Meltdown, Geometry Dash World and Geometry Dash SubZero. Geometry Dash Lite is a free version of the main game that removes certain levels and icons, the level editor, and many online features. Both the spin-off games and Geometry Dash Lite contain advertisements.The game was praised for its challenging but addictive gameplay. It has spawned a large community of players and creators.[1]The beginning of 'Electroman Adventures', the 13th level in the gameGeometry Dash can be played using a touchscreen, keyboard, mouse or controller. The player, represented by a customisable icon, is controlled by pressing or holding inputs to navigate through auto-scrolling levels until the end is reached. The level restarts from the beginning if the player collides with an obstacle, such as a spike or wall. A 'practice mode' option allows the player to place checkpoints to help with level familiarity; however, progress cannot be earned towards normal level completion. The in-game music's timing and rhythm are crucial, often synchronising with gameplay.[2][3] In 'platformer' mode, players can move left or right without the auto-scrolling camera.Besides the aforementioned obstacles, other gameplay elements also effect the movement of the player icon, including portals, pads, and orbs that change the player's gravity, speed, size, and gamemode. The player's gamemode, or vehicle, determines the motion of the player icon; for example, in the "cube" gamemode (the first gamemode introduced in Geometry Dash), the player jumps a predetermined height upon a single input. The "ball" gamemode switches the player's gravity, while in the "wave" gamemode, the player icon only moves in diagonal lines. Portals and pads affect the player when they pass through them, while orbs affect the player only if they make an input while passing through them. The full version of Geometry Dash includes 26 main levels, 4 of which are platformer levels. Each level is assigned one of six difficulties: "Easy", "Normal", "Hard", "Harder", "Insane", and "Demon". Each main level contains three secret coins, requiring the player to take a different pathway to obtain them. There are three demon levels among the main levels, and the player must obtain a number of secret coins before they can be played. Each level rewards players upon completion.[2][4]Player icons can be customized: icon design, primary and secondary colors, death explosion effects and ship trails can be changed. These customization options can be unlocked by completing main levels, collecting enough secret coins, earning achievements or buying them in the shop.[5]The full version of the game features the ability to upload and play user-created levels, with Lite and World offering a rotating selection of 20 user-created levels.[6] These levels may use music from the official levels or feature custom music that can be imported from Newgrounds. From 2017 onwards, user-made "demon" levels are divided into five additional difficulties: "Easy Demon", "Medium Demon", "Hard Demon", "Insane Demon", and "Extreme Demon". Certain levels feature user coins, which are collected in a similar way to secret coins.[7] User-made levels of sufficient quality may be officially "rated" by Topala. Playing a rated level awards orbs and diamonds, in-game currency that can be used to purchase additional player icons. Upon completing a rated level, the player receives a certain number of 'stars', which correspond to the difficulty of the level. Unlike orbs or diamonds, stars cannot be used to purchase items.Update 2.2 introduces the 'platformer' mode, where players move left or right without the auto-scrolling camera. Upon completing a rated platformer level, the player receives 'moons' instead of stars. Like stars, moons are not used to purchase collectibles. Platformer mode features the same gamemodes as in regular Geometry Dash, with the exception of the wave and the swing, which are absent, and the ship, which is replaced by the similarly functioning 'jetpack'. There are four official platformer levels, located in a section of the game called 'The Tower'. RobTop Games logoGeometry Dash was created by Swedish video game developer Robert Topala, known professionally as RobTop. On 6 June 2010, Topala created his first video game, Bounce Ball Thingy, on Newgrounds, developing it while he was at university studying civil engineering. He abandoned his course because he became more interested in the video game industry.[8] Topala decided to work alone, founding RobTop Games in 2012. The first video game he produced under RobTop Games was Boomlings, a puzzle video game released on 5 November 2012 for mobile devices.[9][10] Topala continued to create video games, including Memory Mastermind (2013) and Boomlings MatchUp (2013).[11][12]According to Topala, the game began as a project that could have moved in any direction. He remarked, 'It simply started as a template with a cube that could crash and jump'; 'There really was no detailed plan'.[13] He previously developed it for the computer and later altered his plan and made attempts to make it a mobile game. The Impossible Game inspired Topala, and it took about four months to create the game and bring it to the App Store and Google Play Store. In the beta version, the game was called Geometry Jump but later changed to Geometry Dash. The game is developed on the Cocos2d game engine.[14] A trailer was released on 29 April 2013, featuring a level using the song Ultimate Destruction (made by Tmm43). The song is not present in the final game, however the level was later redesigned into the fifth official level, called Base after Base.[15]Upon its release, Geometry Dash had seven levels and two game modes.[7] It gained popularity worldwide, especially in Canada, becoming the most popular paid iPhone app in June 2014.[16] There are four free versions of the game, one being Geometry Dash Lite, which includes 23 levels from the full version, including the tower levels.[4]The game has received regular updates, adding new levels, game modes, player icons and other features.[7] Sneak peeks are released on YouTube, showing clips of features from new updates. Spin-off games were released in order to promote some updates, with Meltdown, World and SubZero, featuring content from versions 2.0, 2.1, and 2.2, respectively.After multiple delays, update 2.2 was released on December 19, 2023, for all platforms. The update was heavily anticipated, taking over 6 years to develop. The update added a brand new platformer mode, allowing the player to control the character's horizontal movement instead of the level automatically scrolling to the right. Upon the release, the game hit a peak of 80,000 simultaneous players on Steam, a new record. With the updated level editor having numerous additions, people were able to recreate entire games, such as Super Mario Kart, using only in-game objects.[1][17][18]Stereo Madness, a song that plays on the eponymous first level.The music of Geometry Dash was produced by a variety of different artists, with some tracks being licensed and others produced specifically for the game, including ones made by Robert Topala himself. Certain menu sections feature royalty-free compositions by Kevin MacLeod. The music that plays during levels consists mostly of EDM and other electronic genres.[1] Tracks may be cut in order to fit the length of the level, which is usually around 1-2 minutes.The game received generally positive reviews from critics. Softpedia complimented the game's style and the challenge it brings up, saying, 'While it can get a bit frustrating sometimes, you can always complete the stages using the practice mode and then jump into the many different user-generated levels'.[19] 148Apps also gave the game a positive review, stating, 'Geometry Dash provides all of the challenge expected from an "impossible" game while also making it more accessible to newcomers'.[20] Geometry Dash has been listed by the reviewer Chris Morris on the website Common Sense Media as a child-friendly video game that parents could let their children play on, stating that the game was a 'good way to handle frustration' and that 'families can also talk about rhythm and the joy of dancing in time with music'.[21] Geometry Dashwas the second-best and seventh-best-sellingiPad and iPhonegame in the App Store in 2018.[22] YearVideo gamePlatformRef(s).2013Geometry Dash2013: iOS, Android; 2014: Microsoft Windows, macOS [23][24]Geometry Dash LiteiOS, Android[25]2015Geometry Dash Meltdown[26][27]2016Geometry Dash World[28]2017Geometry Dash SubZero[29]Geometry Dash Lite is a free version of the game with advertisements and gameplay restrictions. Geometry Dash Lite includes only main levels 1-19, all tower levels, and a few selected levels that are either Featured, Daily, weekly or Event levels but does not offer the option to create levels or play most player-made levels. It also has a significantly more limited selection of character customisation options, lacking many icons, colours, and other character effects in the full game.[30][31]On 16 December 2015, Topala announced a spin-off game, Geometry Dash Meltdown,[32] which was released on 19 December 2015 for iOS and Android.[33][34] It includes three levels featuring songs by F-777. The game showcased new icons and features in levels added in version 2.0 of the original game.On 21 December 2016, Topala announced a second spin-off game, Geometry Dash World,[35] saying it would come out on the same day. It includes two five-level worlds, introducing features that came to the original game later in update 2.1.[36][37] It also features a selection of levels created by other players.Gamezebo praised the game's captivation and decent gameplay styles. Although, the reviewer noted that it was not the 'most interesting looking game out there'.[38] Gerson Noboa from AndroidGuys said, 'Geometry Dash World is a worthy addition to your game arsenal. Thanks to tightly connected graphical and sound elements, the game provides an awesome, integrated experience that is rarely seen in Play Store games'.[39]On 12 December 2017, Topala announced a third spin-off game, Geometry Dash SubZero,[40] which was released on 21 December 2017.[41][42] Geometry Dash SubZero's levels all contain features present in update 2.2, despite the update's release date being years later.[43]^ a b c Ettinger, Garrett (22 December 2023). Embark on a rhythmic journey through the geometric wonders of "Geometry Dash" and defy gravity with your fingertips. Experience the adrenaline rush of precision-based gameplay, addictive challenges, and an immersive audio-visual feast. The game is available for free download and can be installed on supported Windows versions and hardware mentioned below. Geometry Dash Overview Geometry Dash is a rhythm-based platforming game developed by RobTop Games; this addictive mobile and PC title combines fast-paced gameplay, vibrant visuals, and a pulsating soundtrack to create an exhilarating experience for players of all ages. With its simple yet challenging mechanics, it tests players' reflexes and timing as they navigate through various geometric obstacles, spikes, and hazards. Gameplay Mechanics The Basic Controls And Mechanics Of The Game Geometry Dash features straightforward controls that are easy to learn but difficult to master. Players navigate their way through various geometric-themed levels by tapping the screen to make their characters jump. Timing is crucial, as even the slightest misstep can fail. The Different Gameplay Elements, Such As Jumps, Obstacles, And Checkpoints The game presents an array of obstacles, including spikes, saw blades, and moving platforms, that players must overcome with precise jumps and maneuvers. Checkpoints are strategically placed throughout the levels, providing relief and allowing players to resume from a particular point if they fail. The Different Game Modes Available, Including Normal Mode, Practice Mode, And User-Created Levels Geometry Dash offers multiple game modes to cater to different player preferences. In the normal mode, players tackle pre-designed levels with increasing difficulty. Practice mode allows players to hone their skills on specific segments of a level, making it ideal for mastering challenging sections. Additionally, the game has a thriving community of players who create and share their levels, providing endless content for players to explore. Level Design in Geometry Dash The Game's Unique Geometric-Themed Levels And Vibrant Visual Style Geometry Dash free download for PC, boasts a visually striking design with geometric shapes, vibrant colors, and dynamic backgrounds. The levels are meticulously crafted to align with the rhythm of the accompanying music, enhancing the immersive experience. Various Types Of Levels, Such As Easy, Medium, Hard, And Demon Levels The game offers a wide range of levels categorized by difficulty. Easy levels introduce the mechanics and gradually progress in the challenge as players move on to medium, hard, and demon levels. Demon levels, the most difficult of all, provide a daunting test of skill and precision for seasoned players. Difficulty And Progression Game's Difficulty Curve And How It Gradually Increases With Each Level Geometry Dash excels at providing a carefully balanced difficulty curve that keeps players engaged and motivated. As players advance through the game, the levels become progressively more challenging, testing their reflexes and timing to the limit. This gradual increase in difficulty allows players to develop their skills organically and feel a sense of progression. Rewarding Feeling Of Progress And Accomplishment Upon Completing Challenging Levels Completing challenging levels in Geometry Dash free download is an immensely satisfying experience. The game rewards players with visual and auditory cues and celebratory animations upon successfully completing a level. This accomplishment fuels players' determination to take on even more difficult challenges. Game's User Rating System For Levels, Allowing Players To Identify Difficulty And Quality To help players identify levels that suit their skill level, Geometry Dash incorporates a user rating system. Players can rate and provide feedback on each level, allowing the community to curate a collection of levels that span various difficulty ranges. This system ensures players can find levels matching their abilities and preferences. Final Words Geometry Dash is a captivating rhythm-based platform game that offers addictive gameplay, challenging levels, and a vibrant community. With its unique mechanics, visually striking levels, and synchronization with music, the game provides an immersive experience that keeps players engaged for hours. Whether you are a fan of platform games or simply looking for a new and exciting gaming experience, Geometry Dash latest version is worth exploring. Join the millions of players worldwide and dive into the addictive world of rhythm and geometry. Let the beats guide your actions as you conquer challenging levels, connect with fellow players, and immerse yourself in Geometry Dash's thriving community.How to Change Geometry Dash Background Music. Difficulty opinions vary wildly from it being easier than Lucid Nightmares to being harder than Zodiac. It is unknown when exactly Thinking Space came out. But for the first time, it became known on November 23, 2022, during early 2.0, when HidekiX published a video showing the auto version of the level (the non-auto version was verified at the time, probably using cheats). Over t.Video advice: How to make a Galaxy Background with planetHello guys hope you like the background tutorial. I hope its helpful.The level had a secret way at 39%, in which the player has to direct their wave above the normal route and into a small passage partially obscured with thorn-like decorations. However, the player needs about 55 clicks per second to pull it off, so it is almost humanly impossible. It has since been patched.ContentsIt is unknown when exactly Thinking Space came out. But for the first time, it became known on November 23, 2015, during early 2. 0, when HidekiX published a video showing the auto version of the level (the non-auto version was verified at the time, probably using cheats). Over time, the video scored a small number of views and comments. As several famous players played the level, it became more known. Further various players tried to beat this level. Some made progress (the highest records were 40%, 41%, 42%, and 45%), for the most part in 2018-2019 (perhaps there were a couple of earlier records). It is also worth noting that on February 27, 2018, the well-known Stormfly released a video-cutting passage of Thinking Space. Perhaps it was because of this that many players remembered this level.Rainbow Fade TutorialI decided to rip off someone other than Sea1997. So Im ripping off ScottJames27!! Yay!!!! I get a lot off comments asking me how I get a rainbow fade, so to answer them, Ill make a tutorial highlighting the tree ways to make a rainbow fade. This will be from easiest-hardest. Easiest Method: The Hue SliderThe hue slider is used to make rainbow fades easy. For some reason, knobbelboy, the master of rainbow, hasnt used this method to my knowledge. Step 1: open the color editor, shown hereStep 2: increase the hue by 2 and copy and paste the block one space to the right. Keep doing this until you want to stop. Step 3: layer your row of blocks one space up and one space right. Step 4: trim these blocksStep 5: either trim the blocks to the left, or stack blocks on the first block with a negative 2 hue. Like thisYour fade should not look like this. I exaggerated this step to show what it should look like. Step 6: trim excessYou can experiment with different block sizes, types, different hue changes.ScratchMake games, stories and interactive art with Scratch. (scratch.mit.edu)This really is my signature (it is going instantly under every publish I make)! Here is a little suggestions about foruming, incidentally. Avoid SAND. SAND means four words. SAND means Junk e-mail, Advertising, Necroposting, and Derailing. Junk e-mail means posting something unrelated. Wiki Article: SpamAdvertising happens when you market your studios and projects. Wiki Article: AdvertisingNecroposting happens when you publish on the old subject. It distracts other helpers! Wiki Article: NecropostingDerailing happens when you publish something which leads others from the subject. Its known as thread hijacking. Wiki Article: Derailing(Derailing idea originates from this person), Oss are boring and overrated now.Video advice: Space Background Tutorial (No Lag)Heres a tutorial on how to make a space background with a low amount of objects! The Level Editor is a feature in Geometry Dash which allows the player to create their own user levels and share them online with other people. 1:238:13How to use Colour Trigger (Part 1/2) | Geometry Dash Tutorial - YouTubeYouTube. 3:578:50Scratch Geometry Dash tutorial! (Part 1) - YouTubeYouTube. Geometry dash 2.2 is going to release on October 14th, 2022. Ask the publishers to restore access to 500,000+ books. Geometry Dash is an addictive rhythm-based platformer game developed by Swedish game designer Robert Topala under the name RobTop Games. Released in 2013 for mobile platforms and later ported to PC in 2014, this challenging side-scrolling adventure has captivated players with its simple yet demanding gameplay.In Geometry Dash, players control a geometric shape, typically a cube, navigating through a series of obstacle-filled levels synchronized to energetic electronic music. The games popularity stems from its perfect blend of rhythm, precision, and visual aesthetics, creating an experience thats both frustrating and rewarding.The PC version of Geometry Dash boasts 26 official levels, each with unique designs and soundtracks. These range from beginner-friendly challenges to mind-bending expert courses that will test even the most skilled players.One of Geometry Dashs standout features is its robust level creation system. Players can design and share their own levels, leading to an almost infinite supply of user-generated content. This feature ensures that the game remains fresh and exciting long after completing the official levels.Geometry Dash offers a wide array of icons, colors, and effects to personalize your character. Players can unlock new customization options by completing levels, achieving specific goals, or purchasing them with in-game currency.For those struggling with particularly challenging sections, Geometry Dash includes a practice mode. This feature allows players to place checkpoints and perfect their timing without the pressure of starting over from the beginning.Geometry Dashs gameplay is deceptively simple yet incredibly challenging. Players must time their jumps and movements precisely to avoid obstacles and reach the end of each level. The game syncs these actions with the background music, creating a rhythmic experience that feels both intuitive and demanding.As players progress, theyll encounter various game modes that alter the basic mechanics. These include flying segments, gravity changes, and size modifications, adding layers of complexity to the core gameplay.Addictive and challenging gameplayExcellent soundtrack that enhances the experienceVast library of user-generated contentRegular updates and new official levelsRobust level editor for creative playersCan be extremely frustrating for some playersSteep difficulty curve in later levelsLevel editor has a learning curveMay become repetitive for some players over timeGeometry Dash on PC offers an enhanced experience with improved graphics and smoother gameplay compared to its mobile counterpart. Whether youre a casual player looking for a quick challenge or a dedicated gamer aiming to conquer the most difficult levels, Geometry Dash provides an engaging and rewarding experience that will keep you coming back for more.the free encyclopedia that anyone can change.Search the 270,022 articles in the Simple English WikipediaHow to write Simple English pages Useful pages Simple talk Categories HelpSchools Gateway (for users who want to make changes from a school)This is the front page of the Simple English Wikipedia. Wikipedias are places where people work together to write encyclopedias in different languages. We use Simple English words and grammar here. The Simple English Wikipedia is for everyone, such as children and adults who are learning English.There are 270,022 articles on the Simple English Wikipedia. All of the pages are free to use. They have all been published under both the Creative Commons Attribution/Share-Alike License 4.0 International License and the GNU Free Documentation License. You can help here! You may change these pages and make new pages. Read the help pages and other good pages to learn how to write pages here. If you need help, you may ask questions at Simple talk.When writing articles here:Use Basic English words and shorter sentences. This allows people to understand complex terms or phrases.Write good pages. The best encyclopedia pages have useful, well-written information.Use the pages to learn and teach. These pages can help people learn English. You can also use them to make a new Wikipedia to help other people.Simple does not mean short. Writing in Simple English means that simple words are used. It does not mean readers want basic information. Articles do not have to be short to be simple; expand articles, add details, but use basic vocabulary.Be bold! Your article does not have to be perfect, because other editors will fix it and make it better. And most importantly, do not be afraid to start and make articles better yourself.Hurricane Vince was an unusual hurricane that began in the northeast Atlantic Ocean. It was part of the 2005 Atlantic hurricane season. The waters where it formed were thought to be too cold for tropical cyclones to exist. Vince was the 20th named storm and 12th hurricane of the season.The storm that became Vince started out as an extratropical cyclone. It became a subtropical storm on October8 to the southeast of the Azores. The National Hurricane Center (NHC) did not officially give the storm a name until the next day. Vince grew into a hurricane before beginning to weaken at sea. On October11, it made landfall on the Iberian Peninsula in Spain. At that time, it was a tropical depression. It may have been the first storm to hit the area since a hurricane in 1842. Vince died out over Spain. However, it dropped rain in the country. What was left of the storm passed into the Mediterranean Sea.more...Other very good articles Proposals RequirementsFrom a collection of Wikipedia's articles:... that the bee hummingbird (pictured) from the Isle of Youth in Cuba is the smallest living bird species in the world with an average length of only 5-6 centimeters?... that in 1924, University of Chicago law students Nathan Leopold and Richard Loeb murdered a 14-year old boy to show that they were intelligent?... that the French word for sausage comes from Vulgar Latin salsica, which comes from salsicus meaning seasoned with salt?... that in 1923, Calvin Coolidge was inaugurated as President of the United States at his family farm in Vermont by his father?... that Istanbul is the only city in the world that is on two different continents: Europe and Asia?... that during Daniel J. It started being sold for $2.00 USD on August 13 2013, and is a 2D platform game that involves dodging obstacles (spikes, walls, and creatures) in a series of levels. Players can create levels in the level editor, and play levels made by other players. There are many tools for creating levels: rings (commonly just called orbs) that let you jump mid air, pads that boost you up higher, and triggers that allow the level creator tThe player moves towards the right of the screen automatically in the game's classic mode, wheres the player has full control of their movement in platformer mode (released in the latest update, 2.2).There are gamemodes that the player can turn into: Ship, Ball, UFO, Wave, Robot, Spider, and Swing. All of these gamemodes have unique physics, and their own customisable icons!Geometry Dash is available on Steam, and Mobile.The player can use the keyboard, touch screen, controller, mouse, etc. to control the icon.Unlocking new icons requires collecting each of the games different currencies, and can be done by completing quests, lists and certain levels (daily, weekly, gauntlet) for diamonds, completing map packs and official levels for secret coins (or star rated levels for user coins) and star rated / official levels for stars (with platformer levels rewarding moons instead). Beating or progressing any star rated level also grant mana orbs (a feature introduced in update 2.1).The Geometry Dash user-made levels range in difficulty from auto to demon (at its peak, extreme demon) with thousands of levels to explore. Wikimedia Commons has media related to Geometry Dash.Official website This short article about video games can be made longer. You can help Wikipedia by adding to it.Retrieved from " Adobe, Apowersoft, Ashampoo, Autodesk, Avast, Corel, Cyberlink, Google, iMyFone, iTop, Movavi, PassFab, Passper, Stardock, Tenorshare, Wargaming, Wondershare February, 3rd 2025-Paid Latest Version Geometry Dash LATEST Review by Jack Taylor Operating System Windows 7 / Windows 8 / Windows 10 / Windows 11 User Rating Author / Product RobTop Games / External Link Geometry Dash is an action cross-platform gaming app for smartphones, computers, and tablets running Windows, Mac, Apple iOS, or Android operating systems.The gameplay is rhythm-based, which means you have to jump and fly past obstacles. If youre utilizing a mobile device, you can tap the screen to move past obstacles. Otherwise, youll have to utilize the up key, down key, spacebar key, and left-click on your keyboard and mouse to control the character.Most of the levels contain geometrical graphics. That is why the game is called Geometry Dash. All the rewards, obstacles, player icons, and background visuals are made up of different shapes, such as triangles, squares, circles, and rectangles. When you slide and crash into something, the effects resemble cubes. The second word of the games title, Dash, is attributed to its fast-paced gameplay. Youre forced to maneuver past obstacles by jumping and flying through them at top speeds. If you keep your finger on the up key or spacebar key on the keyboard, itll allow you to do a multi-jump to move further in the level.Players dont have much time to think about their actions because the obstacles come quickly. If you miss a platform or crash, then youll be forced to start the round all over again from the beginning. You can see how much of the Geometry Dash game you have finished by looking at the percentage completed on top of the screen. Main Features Experience Rhythm-infused Action Platforming! Explore numerous levels accompanied by distinctive soundtracks. Create and exchange your own levels using the built-in level editor. Dive into a vast collection of top-notch user-generated levels. Personalize your character with unlocked icons and colors. Engage in exhilarating actions like rocket flight, gravity flips, and more! Enhance your skills with the practice mode. Earn a multitude of achievements and rewards! Take on the ultimate challenge of nearly impossible feats. Exclusive to Steam users: Enjoy two special unlockable icons! Before you begin a level, you can enter into a practice mode to learn where all the puzzles are located in it. If you lose a game, you will get another chance to play automatically.There are checkp
