Because it is powered by the WeAreDevs Exploit API, JJSplit offers a near full Lua executor. JJSplit also features click teleport, ESP, speed, fly, infinite jump, and so much more. A powerful all in one package. Download Now Get going in just a few seconds! Join a game and make sure it fully loads Open JJSplit If the free unlock system appears, follow the instructions JJSplit will automatically attach. Wait for the success notification in game The notification means JJSplit is ready to use. You can now start executing scripts and using the button commands! JJSplit has been a running project since mid-2017. Thanks to the WeAreDevs API, it has gone from a simple command-line cheat to a full featured Lua executor. With the introduction of a Lua executor, we've been able to add many more complex cheats. There are no advertisements and not even a key system. JJSplit is completely free! Just run JJSplit, join a game, then attach. We strongly value user convenience. Is this safe? JJSplit was created by WeAreDevs, so you have our word that JJSplit is safe. Anti-viruses may incorrectly flag JJSplit as malicious due to its nature of exploitation. You may need to disable any anti-virus or firewall. Ideally, you'd whitelist. How long to wait for an update? Because the games update every week, we need to update too. We strive to update ASAP, so usually within the hour or at least the same day. Sometimes there are complications and update times can take longer, but we will put a message on JJSplit if that happens. If you never get an update, then something is probably blocking the update from downloading. You may need to disable your anti-virus or use a VPN so JJSplit can automatically download the update. Why won't this work with the Windows Store version of the game? This was only made for the website version of the game engine. It will not work for the Windows Store version. How can I report a new issue? Please report bugs on the complaints forum found here: Complaints Forum Link Is there a Discord server or any other support platform? No, we do not offer an official server for game cheats. Instead, you can use the forum. Help with it sometimes crashing on injection? If you keep on crashing on injection, please close the game and wait 30 seconds before rejoining the game. Try restarting JJSplit. This may take a few tries until it works. You may even need to try restarting your computer Why do people say its a RAT, Bitcoin miner, etc? JJSplit is safe to use. Claims otherwise are false. Some people see a performance spike and get scared, but it's more likely just an demanding exploit. It doesn't inject in some games JJSplit works for most games, but not every game. Just try playing another game if JJSplit doesn't work there. Fallback update checker used or poor network connection Some internet providers block us due to false positives in the past. You may need to try using a VPN like ExpressVPN or Cloudflare Warp to get around this, otherwise you may not be able to receive updates. It was working 10 minutes ago, but suddenly stopped working for me? If the exploit is marked as working and there was no recent game update, JJSplit is still working, it's just bugging out. Try again in maybe 10-30 minutes. Will I get banned? If you're careful, you can avoid getting banned. Cheating is generally frowned upon and unwelcome to game developers. Any form of exploiting can get you banned. So only do it for fun and always use an alt account! To lower your chances of getting banned, try not to do anything obvious in highly developed games. Flying, teleporting, or running fast across the map is very obvious. Hello, Thank you for posting on WeAreDevs. I understand the inconvenience you are facing, I will certainly help you with this, I would suggest you to try the following steps and check if the issue persists: Step 1: Delete Krnl from your computer Step 2: Redownload it from our website Step 3: Try again Keep note that today IS Wednesday and roblox has patched exploits.
