Our proposed regulations are almost always open to the public for comment, typically for 30-90 days after the date of publication in the Federal Register. You can comment on them in several ways; each rule tells you how in its "Addresses" section. You can also learn more about commenting on our "Get Involved with EPA Regulations" page. Locate an EPA Office, or LabIf you are looking for information about an EPA headquarters office or if you have a question about a local or regional issue, please go to the appropriate EPA Office or organization's page: Once there, look for the "Contact" link in the Related Information box (NOT the "Contact Us" link in the upper right corner of the page -- clicking on that will bring you back to this page). Find a Mailing Address EPA headquarters EPA Regional offices Laboratories and satellite locations Subscribe to News Releases, Newsletters, and Alerts Access our Libraries Our librarians can help you get information about the environment and related scientific, technical, management, and policy information. Learn about the services of the EPA National Library Network and perform a quick search of our library collections Submit a Freedom of Information Act (FOIA) Request Learn more about the FOIA process Can't find the information you are looking for? Try these resources We strive to respond to every request with an answer or an appropriate referral as quickly as possible. Most websites within epa.gov have their own "Contact Us" pages. Almost every page on epa.gov has links at the upper right and at the bottom that go to the "Contact Us" page for that topic. You will receive a quicker response if you send your question or comment to the "Contact Us" page that is most closely related to the topic you're interested in. Still can't find the answer? EPA's environmental topics guides you to the most popular pages in your topic of interest. Find EPA Articles and News Releases related to popular topics. Search the A-Z Topic Index for specific terms. Recent EPA Perspectives Articles: Through the Community Connectors grant program, we partner with community-based organizations and local governments to envision future development in corridors adjacent to highway infrastructure. There is no safe level of lead. Lead can be present in drinking water without any noticeable changes in color or odor. It is the responsibility of private well owners to test their water for lead and to take appropriate measures to mitigate exposure. Early in my career I realized that shifting the mindset of students in my classroom, especially on a social norm that valued consumerism over environmentalism, was a challenge with context and nuance far beyond my classroom walls. Read EPA Perspectives Recent EPA News Releases: U.S. Environmental Protection Agency (EPA) has issued an order directing the Atlantic City Municipal Utilities Authority (ACMUA) to comply with the Safe Drinking Water Act (SDWA)'s Lead and Copper Rule. By providing more realistic timelines for owners and operators of new and modified oil and natural gas sources, the Trump EPA is taking an important step in unleashing America's domestic energy supply. BOTTOM LINE: EPA-Approved Single Fluorinated Compounds Are NOT Forever Chemicals and Pose No Safety Concerns When Used According to Label Instructions Additionally, \$1.1 Billion of Unused Funding Redistributed for States EPA announced \$3 billion in new funding for states through the State Revolving Fund (SRF) programs to reduce exposure to lead in drinking water. Search all News Releases EPA has announced Feed It Onward, a new national initiative designed to reduce food waste and strengthen food security across America. Learn more about Feed It Onward Administrator Zeldin signed a Memorandum of Understanding with Mexico to urgently solve the decades-long Tijuana River sewage crisis. Read more about the MOU This initiative will guide EPA's work to protect public health and the environment while restoring the greatness of the American economy for the first 100 days and beyond. Read the news release From remediating contaminated sites to ensuring clean drinking water, what happens here improves human health and the environment for all Americans. Discover EPA-hosted webinars to learn how to apply for, or manage an EPA grant. Learn how water gets to your drinking water tap every day, the different types of public water systems, and other basic information about drinking water safety. Read the latest news from EPA.
