Green supply chain is a term used to describe a supply chain that is designed to be environmentally friendly. It involves a range of practices and processes aimed at reducing the environmental impact of a company's operations, from the sourcing of raw materials to the production and distribution of finished goods. Key elements of a green supply chain include sustainable sourcing, energy efficiency, waste reduction, and the use of eco-friendly materials and packaging. The goal is to create a supply chain that is not only profitable but also socially and environmentally responsible, contributing to a more sustainable future.
