## How long does a cans assessment take.

This song was made when Smoke Hijabi misread a fake tweet as a real one from retired adult film star Mia Khalifa that was posted by the Instagram meme page trashpump. Aqsa responded to the fake tweet with a (now deleted) video on Twitter, even showing the image of the fake tweet as well. The song got a resurgence of popularity around late October 2018 after nyannyncosplay made a TikTok video, lip-synching to the song whilst cosplaying as Nico Yazawa from Love Live! School Idol Project. The video has since been removed from TikTok, but it can still be seen on YouTube here.
biglittledragoon Bonjour, la base, mon fichier xconf.org posait un probleme car l'image tait dcal et j'ai suivi cette recette.Aujourd'hui, j'ai encore un souci quand j'essaie de lire des vidos avec le module xvideo: l'image est aplatie et il y a une grande bande noire en bas (la capture d'cran ne fonctionne pas) que ce soit avec VLC ou Totem.J'ai essay de rentrer manuellement la taille de mon cran.xdpyinfo | grep dimensionsMe donnedimensions: 1024x768 pixels (271x203 millimeters)Dans mon fichier xconf.org, je modifie ainsiSection "Monitor" Identifier "Generic Monitor" Option "DPMS" DisplaySize 271 203 # In millimeters HorizSync 28-51 VertRefresh 43-60EndSectionLe probleme est que a ne fonctionne pas comme a le devrait: l'image redevient dcale et les vidos sont toujours aplaties.J'ai essay d'utiliser la sortie X11 sur VLC. Dans ce cas, les proportions sont bonnes, mais la qualite de l'image est moins bonne, mais surtout, elle est teinte de bleu.Si quelqu'un a une piste, je suis trs preneur!Merci.BLDEDIT: prcision sur le rsultat de la modification de xconf.org. Dernire modification par biglittledragoon (Le 01/05/2011, 16:03) La connaissance ne vaut que si elle est partage.Lubuntu LTS (Xubuntu)Compaq Presario 1802FRMobile Intel Pentium IIIE, 900 MHz / 320 Mo (SDRAM) / ATI Mobility 128 Slevin 69 Hello !Si ton serveur X plante au dmarrage c'est qu'il n'est pas bien configur. En regardant le lien qui t'a permis de rgler ton premier probleme, j'ai vu que tu avais utilis un xorg.conf tout fait, ce qui ne peut causer que des problemes mon avis ^\_^ Le plus simple serait d'en grner un automatiquement, et de le modifier en fonction des problemes que tu as.Dans un premier temps, on va sauvegarder ton xorg.conf actuel, au cas o les differentes manip' qui suivent n'aboutissent pas un rsultat satisfaisant ! Donc tu ouvres un terminal, et tu tapes : cp /etc/X11/xorg.conf ~/xorg.conf.backupTa configuration actuelle sera donc sauvegarde dans ton rpertoire utilisateur avec pour nom xorg.conf.backup |Maintenant, il te suffit de suivre le poste #2 du lien suivant : |Cela te permettra d'avoir un fichier xorg.conf propre et qui t'vitera probablement d'avoir des bugs. En tout cas il sera plus facile de les corriger.Ah et, 2 autres informations qui pourraient nous tre utiles, tape les commandes Ainsi que : Et renvoie nous le rsultat ^\_^ Bon courage Dernire modification par Slevin 69 (Le 01/05/2011, 16:16) biglittledragoon Dj merci pour une rponse si rapide.Comme la premiere manip' a l'air un peu longue, je poste dj les autres infos.lshw -c displayWARNING: you should run this program as super-user. \*.display UNCLAIMED description: VGA compatible controller product: Rage Mobility M3 AGP 2x vendor: ATI Technologies Inc physical id: 0 bus info: pci@0000:01:00:0 version: 02 width: 32 bits clock: 66MHz capabilities: bus master cap list configuration: latency=66 mingnt=8 resources: memory:f8000000-fbffff(prefetchable) ioport:9000(size=256) memory:f0200000-f0203fff memory:f0220000-f023ffff(prefetchable)Etuname -aLinux biglittledragoon-laptop-linux 2.6.32-31-generic #61-Ubuntu SMP Fri Apr 8 18:24:35 UTC 2011 i686 GNU/LinuxJe vous tiens au courant pour le reste. ;-) La connaissance ne vaut que si elle est partage.Lubuntu LTS (Xubuntu)Compaq Presario 1802FRMobile Intel Pentium IIIE, 900 MHz / 320 Mo (SDRAM) / ATI Mobility 128 biglittledragoon Manip' teste: a me recre le probleme lors de ma premiere installation de Xubuntu, savoir un cran dcal La connaissance ne vaut que si elle est partage.Lubuntu LTS (Xubuntu)Compaq Presario 1802FRMobile Intel Pentium IIIE, 900 MHz / 320 Mo (SDRAM) / ATI Mobility 128 Slevin 69 a parat logique maintenant peut-tu voir ce que contient le xorg.conf qui rgloit ce probleme ? ^\_^En tout cas conserve bien le fichier xorg.conf qui a t gnr (mme avec le bug de dcalage) et remets le xorg.conf fonctionnel dans le fichier /etc/X11/biglittledragoon C'est celui qui tait dans mon lien:# xorg.conf (X.Org X Window System server configuration file)# This file was generated by dexconf, the Debian X Configuration tool, using # values from the debconf database.## Edit this file with caution, and see the xorg.conf manual page. # (Type "man xorg.conf" at the shell prompt.)## This file is automatically updated on xserver-xorg package upgrades \*only\*# if it has not been modified since the last upgrade of the xserver-xorg# package.## If you have edited this file but would like it to be automatically updated# again, run the following command:# sudo dpkg-reconfigure -pigh xserver-xorgSection "InputDevice" Identifier "Generic Keyboard" Driver "kbd" Option "XkbRules" "xorg" Option "XkbModel" "pc105" Option "XkbLayout" "us" Option "XkbVariant" "intl" Option "XkbOptions" "lv3:ralt\_switch"EndSectionSection "InputDevice" Identifier "Configured Mouse" Driver "mouse" Option "CorePointer"EndSectionSection "InputDevice" Identifier "Synaptics Touchpad" Driver "synaptics" Option "SendCoreEvents" "true" Option "Device" "/dev/psaux" Option "Protocol" "auto-dev" Option "HorizEdgeScroll" "0"EndSectionSection "Device" Identifier "ATI Technologies, Inc.
