Toyota supra 2025

The GR Supra also has one of the best driving positions in the class. The seats – whether they are the standard, manually adjustable items you get with the lower-spec trim level or the electrically operated upgrades that come with the Pro versions – are supportive on a motorway and hold you well through bends. All versions include adjustable lumbar support and side bolsters so you can get almost everything just so, and that also applies to the reach and rake-adjustable steering wheel, which has loads of extension. You sit low in the GR Supra, in true sports car fashion, ensconced between the high centre console (which makes for a great armrest) and the high window line. In front of you, the digital dials might not have Audi-levels of configurability, but the graphics look swish and all the key information is displayed clearly. The dashboard is dead easy to use as well, with simple, physical controls for all the functions. It's nicely made inside, with plenty of smart-looking plastics and gloss-black trims that lift the interior ambience above the A110's. Everything feels like it'll last, too, although the Porsche Cayman has just that extra little bit of integrity that makes it feel more premium. The high window line makes the Supra trickier to see out of than the Cayman, and the rear bodywork is quite enclosed. You get LED headlights and a rear-view camera as standard on all models, with front and rear parking sensors fitted to all 3.0-litre versions.
